

PROGRAM OF THE CONFERENCE

II CONFERENCE

TECHNOLOGY DAYS

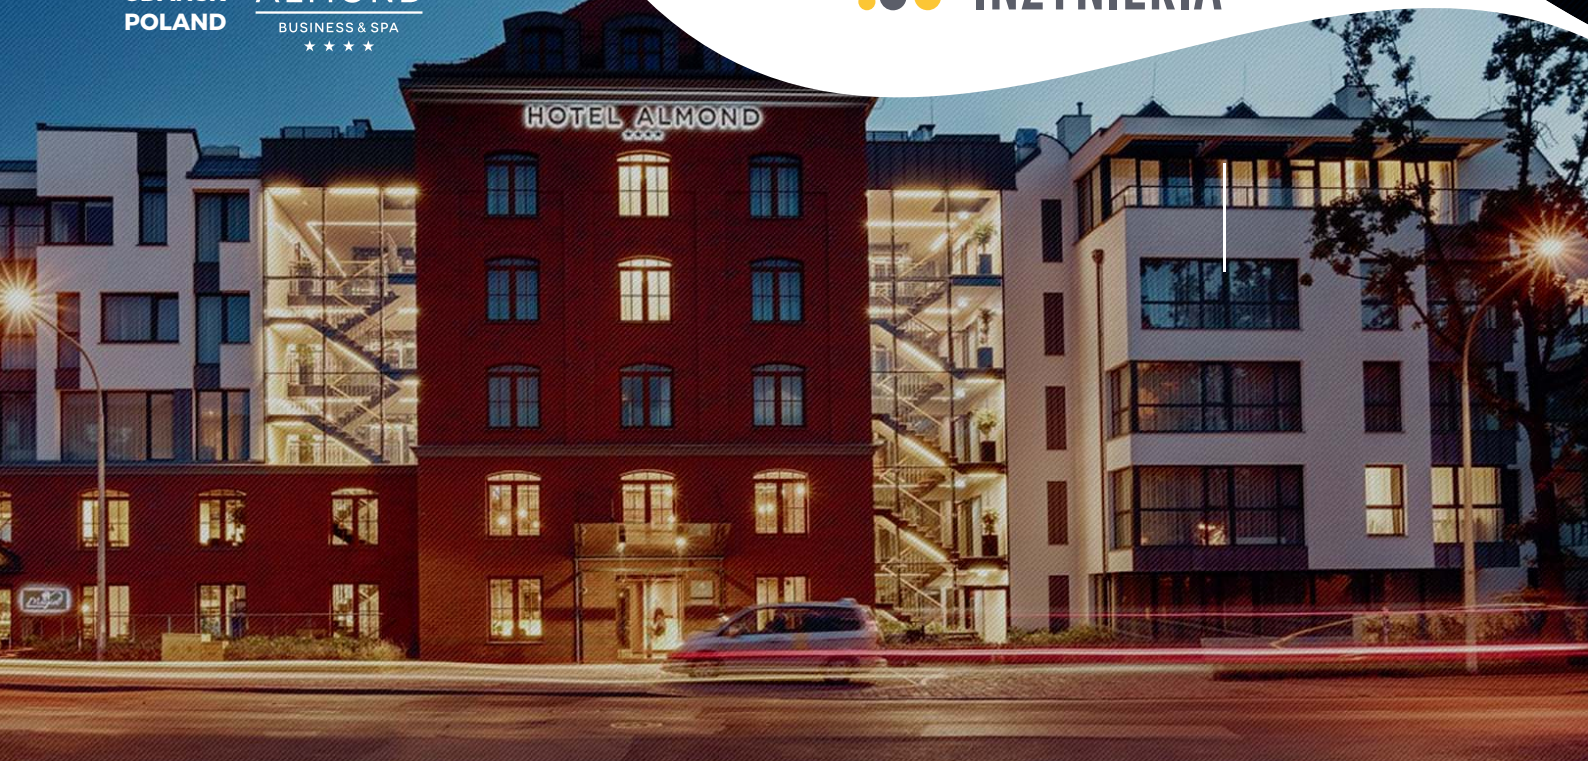

Rehabilitation with liners cured in place

11-12 JANUARY 2018 / GDAŃSK

CONFERENCE
VENUE:
GDAŃSK
POLAND

ORGANIZER

/ PRELIMINARY PROGRAM OF THE CONFERENCE /

According to conference's new formula, each session will end with an open discussion panel. Both speakers and the audience will take part in it. This solution will enable all of the participants, representing different sides of investing process, to get engaged in the discussion.

In case of session III, this type of discussion was chosen to determine preliminary assumptions for the acceptance of CIPP works guidelines that PSTB (Polish Association of Trenchless Technologies) will develop for the Polish market.

January 11th, 2018 (Thursday)

8.30 – 9.30 Registration

9.30 – 9.45 The opening of the conference – Paweł Kośmider, Wydawnictwo INŻYNIERIA sp. z o.o.

1st SESSION 9.45–11.30

An analysis of the chosen factors' impact on the carrying capacity of tight-fit liners – *dr inż. Beata Nienartowicz, Wrocław University of Science and Technology*

The most common mistakes made during the preparation of the Important Order Specifications and the design of CIPP renovation projects – *Stanisław Szczekarewicz, GSG Industria sp. z o.o.*

Best implementing practices compiled on a basis of the most common mistakes and the failures related to them – *Tomasz Daniłoś, BLEJKAN S.A.*

10.55 – 11.30 Discussion

Participants in the discussion will include the speakers that will give their speeches during the session I and the audience

11.30 – 12.00 Coffee break

2nd SESSION 12.00–14.00

Implementation of UV-LED „Bluelight” technology in renovation of connections and sewers up to DN300 – *Jan Krasowski, KrasoTech GmbH*
